

SOCIAL MEDICINE FELLOWSHIP

The Department of Emergency Medicine at University of Iowa Hospitals & Clinics is excited to offer either a one- or two-year position where fellows will serve as part time faculty members at the states only comprehensive medical center.

One-year track will be for fellows who have already completed an advance degree like a MPH.

Two-year track will allow the fellow to obtain an MPH from the University of Iowa College of Public Health.

TRAINING ENVIRONMENT

University of Iowa Hospitals & Clinics and surrounding communities provide an ideal training environment for a Social Medicine fellow. As a fellow you will have numerous opportunities to explore and practically engage in various aspects of medicine related to social determinants of health and population health concerns within our hospital system and community. Based on the fellow's interest, the fellow will focus on developing a research and education project related to their topic of interest.

Our program offers a once-a-month Social EM conference day along with a once-a-month all-fellows conference day that focuses on topics of research, administration, and academic skills.

AS A FELLOW, YOU WILL:

- Interact regularly with community organizations interested in your area of study
- Meet organizations and healthcare providers working on various social medicine topics
- Work with a growing group of EM faculty with diverse training backgrounds
- Learn from a myriad of subspecialists throughout the institution
- Provide education to medical students, residents, and other learners throughout the hospital
- Have access to extensive research infrastructure in the Department of Emergency Medicine

INTERESTED APPLICANTS:

Send a letter of intent, a *curriculum vitae*, personal statement, a letter of good standing from a program director, and three letters of recommendation to Dr. Shannon Findlay.
